EXPERIENCE

Fast Enterprises, Denver CO — *Software Developer*

August 2023 - June 2025

- Created custom tools to convert and adapt data from the legacy system into the modern enterprise platform, streamlining system migration and onboarding.
- Write and optimize SQL queries for backend data processing and reporting, ensuring high performance and reliability across large-scale data operations.
- Implemented data governance standards by reconfiguring sensitive data handling by standardizing tokenization and encryption methods for Social Security Numbers to maintain strict privacy compliance.
- Lead efforts in System Integration Testing (SIT) to validate end-to-end functionality, identify defects, and ensure smooth system performance across modules.
- Identified and resolved more errors than all other developers combined during the testing phase, establishing a reputation as the team's most effective bug finder.
- Drive full-stack development of enterprise software solutions for the Child Support application using object-oriented principles in C#, contributing to the design, implementation, and delivery of core functionality in alignment with client requirements within an Agile development lifecycle.

Kirkland & Ellis, Chicago IL — *Knowledge Services and IT Intern*

June 2022 - August 2022

- Supported firm-wide transition from legacy 2013 software systems to updated 2019 operating systems, improving overall performance.
- Partnered with the IT department to design and develop internal database request forms, streamlining data access for partners firm wide.
- Provided detailed business and legal research for litigation teams using various analytical tools and data sources.

Max Digital, Chicago IL — *Digital Project Intern*

May 2021 - August 2021

- Updated dealership data for over 2,000 entries across the Chicagoland area using both Excel and Google Sheets.
- Designed a more efficient method for accessing both legacy and new dealership data, enhancing internal usability for approximately 500 dealerships.
- Played a key role in cleaning, restructuring, and modernizing the company's outdated data systems.

Levy, Chicago IL — *Chicago Cubs Vendor*

May 2017 - July 2021

- Worked four seasons as a vendor behind home plate at Wrigley Field. Recognized for strong sales, customer engagement, and leadership.

Projects

Professor & TA Scheduling System | React Native

- Redesigned and rebuilt the internal scheduling system for the professors and TAs in the College of Business at the University of Alabama using. Conducted requirements-gathering sessions with faculty to identify scheduling needs and system improvements. Built a prototype that enhanced calendar functionality, reduced scheduling conflicts, and cut down on manual administrative tasks.
